National Gas Discovered By Transco

Houston, Texas – Tests of a natural gas discovery by Transco Exploration Company in East Cameron Block 263 offshore Louisiana have confirmed a significant discovery. The well was the first Transco has operated offshore and the first test on the block.

The test was drilled to 11,039 feet and production test results through perforations from 10,152 to 10,186 feet flowed at a rate of 3.8 million cubic feet per day and 26 barrels of 49-degree API condensate. Flowing tubing pressure was 3,678 pounds per square inch (psi) through a 12/64-inch choke with a calculated open flow potential of 51 million cubic feet per day. A second test from 9,848 - 9,864 feet flowed at the rate of 4.8 million cubic feet per day and 34 barrels of 49-degree API condensate. Flowing tubing pressure was 3,350 psi through a 16/64-inch choke with a calculated open flow potential of 71 million cubic feet per day.

Transco Exploration Company has a 75 per cent interest and McMoRan Exploration Company a 25 per cent interest in the block. The well has been temporarily shut-in pending installation of a production platform. Transco has ordered an 18-slot platform for installation on this block late in 1976. It is estimated that production could commence by mid-1978.

NOTICE

Important notice to Continental Telephone Company of Virginia's Allwood, Amherst, Appomattox, Gladstone, New Castle, Newport, Paint Bank, Pamplin, Raphine, Sweet Briar customers:

The Virginia State Corporation Commission has granted Continental Telephone Company of Virginia an increase in local service rates and rates for certain supplemental services and equipment. The new rates became effective on March 19, 1976, and will be reflected in your next bill.

The additonal revenue generated by the increases granted us will put us in a better position to continue our service improvement program in Virginia. Without these funds, we might not be able to borrow the substantial amounts of money we need to add to central office equipment, install cable, add to long distance facilities, and provide new or improved service to all our customers.

Following is a list of local exchange rates for the Amherst area. Exchanges are grouped by "rate group classification;" that is, all exchanges with approximately the same number of telephones in the local calling area have the same local service rate.
